The Paper Trip III - *The Master Guide to New Identity* ³

The need for new identity has never been greater. Big Brother now works with hundreds of privately-owned databases that track and control millions of names in their files, specifically, YOUR name.

Credit bureaus and other reporting services often victimize innocent people as they trade profitably in your "private" information. Identity theft has become an easy game for scammers, thanks to information brokers who gladly sell your records.

Big Brother adds to the abuse by demanding Social Security Numbers, now even on drivers licenses. A new federal law is set to require a "unique health identifier" for all health records. If this law is imposed, Americans will be forced to have a first-ever National ID.

We oppose this Nazi-minded effort to control records by an "I.D. Number." We don't believe Americans want to be "numbered" by ANY government. And we certainly don't want others, public or private, to "know all about us" with just a few keystrokes.

Our solution to these emerging problems is *The Paper Trip III* - your guide to dealing with Big Brother and living the life you really want. The solution is creating alternate Identity. *The Paper Trip III* reveals the many secrets of alternate identity and how it can help you:

- Eliminate problems from negative records.
- Avoid complications from others knowing too much about you.
- Create secure, low profile privacy for yourself and your property.
- Become "invisible" to investigators who want to sue you.
- Start life over-safely-with new friends, somewhere else.

***The Paper Trip III* helps you create exactly the kind of Alternate Identity you need.** *The Paper Trip III* provides methods that are easy to understand, easy to follow, and easy to use. You will be amazed at how many ways alternate identity can serve you. Best of all, alternate identity will quickly and effectively put you back in control of your own life.

The Paper Trip III offers 15 detailed chapters that explore every aspect of Alternate Identity and how it can work for you:

- Establish ID on Three Levels for maximum privacy and security.
- Use the Three Levels of ID to "compartmentalize" your life.
- Make your records "invisible" and "unknown" to databases.
- How Vital Records offices work. Take advantage of differences.
- Handling mail and telephone with Three Levels of your ID.
- Avoid problems from fingerprints and criminal records.
- Identity theft is easy to do, hard to stop. Protect yourself.
- Obtain a new birth certificate from Vital Records with the name and age you want. You will control your new identity.

- Create new identity using variations among states for issuing drivers licenses and State ID cards. State-by-State comparisons.

- How to live in your new ID: Jobs, Banking, Residence, Education, Medical, Auto, Property, Insurance, Travel, etc.

- Social Security Numbers. How to get a new number-legally. Complete analysis of how the SSN is composed (all digits). How to tell valid SSNs; avoid any "dead" SSNs; create alternate SSNs to match your background. When SSA will make your new number "untraceable."

- The U.S. passport is not always such a great deal. Foreign passports offer advantages, too. Discover new ID beyond the border.

- Do-it-yourself ID. Easy to get. Many options and sources for quick, inexpensive, and convincing "back-up" ID.

- Be aware of trends and developments affecting ID. Learn what Big Brother is "thinking" today--and possibly doing tomorrow.

- Our exclusive library of Sources and Resources makes paper tripping possible. Read what we read. Stay informed.

The Paper Trip III is truly the Master Guide to New Identity. You will be able to take advantage of hundreds of ways to put your new identity into practice without making mistakes.

The unique research in *The Paper Trip III* shows you what to do, how to do it-and what to avoid. The very latest information is ready for you to use TODAY!

Birth Certificate Fraud

Here's an official US government report on "birth certificate fraud." Three main topics are discussed:

- (1) The wide variety of documents issued and the number of agencies involved in their use create very real problems for officials;
- (2) The hundreds of ways birth certificates are used, misused, and sometimes fraudulently abused cost government some \$30 billion annually;
- (3) Proposals are made for making birth certificates more "secure": that is, less susceptible to fraudulent use.

Privacy-seekers need to be aware of government attitudes that might affect future options, in particular, those that pertain to the issuance and use of birth certificates. Without condoning criminal activity, we maintain there are many perfectly legitimate reasons why individuals may at some time need to adopt new identities. This report illustrates potential "pitfall" situations individuals should take into account. Latest information available on this vital subject.

- Correct use of effective tactics: Denial, Confusion, Promises, and Part Payment.
- How to create a counter-claim.
